

D-TRUST TIMESTAMP

Confirming the time of receipt for electronic documents in a manner recognised by law

Legally recognised, qualified timestamps can only be issued by accredited suppliers like D-TRUST, Bundesdruckerei's trust center. Trust centers assume the role of a trusted third party and guarantee that partners who do not know each other can mutually identify themselves using certificates. The D-TRUST timestamp guarantees in a legally recognised manner that an electronic document was not modified after the timestamp was attached.

Advantages at a glance:

- **Made in Germany**
The certificates are produced in the electronically and physically secure environment of D-TRUST, Bundesdruckerei's trust center.
- **Verifiable validity**
Pursuant to the German Act on Digital Signature, the validity of electronic documents with a qualified timestamp can be checked for a period of 30 years.
- **Secure time source**
The time is synchronised with the German DCF 77 time signal. The maximum deviation typically totals less than 100ms and no more than 500ms in 48 hours in the case of a time signal failure.
- **Legally recognised proof**
In conjunction with a qualified electronic signature, the D-TRUST timestamp is legally recognised proof that an electronic document was not changed after signing.
- **Reliable support**
When it comes to technical questions regarding the D-TRUST timestamp, D-TRUST, Bundesdruckerei's trust center, offers first and second level support in German as well as e-mail support on workdays from 8am to 5pm.

REQUIREMENTS

- Client or server software compatible according to RFC 3161 (Internet X.509 Public Key Infrastructure Time-Stamp Protocol (TSP)) e.g. from secrypt or OpenLimit
- D-TRUST softtoken for authentication at the timestamp service

THE EXPERTISE AND SECURITY OF A TRUST CENTER

Trust centers like D-TRUST are certification authorities which, thanks to their technical, organisational and legal expertise, are capable of:

- producing certificates in an electronically and physically secure environment,
- reliably verifying the information to be certified, and
- offering a permanently available repository service for valid and revoked certificates.

PRICE INFORMATION

(Valid for 24 months)

- > Starter pack containing one D-TRUST softtoken for authentication, including 500 timestamps € 199.00
- > Extension by another 24 months € 84.00

Please note that following expiration of the validity period (24 months) an existing quota will expire unless extended.

ADDITIONAL QUOTAS

500 pieces	€ 70.00
2,000 pieces	€ 260.00
